OUR APPROACH

1	Planning Define audit protocols, scope, objectives and risk-based audit plan.
2	Process Walkthrough & Assessment of Current State Understand end-to-end processes, identify control gaps and document current state.
3	Execution & Reporting Sampling & testing, audit reports with actionable recommendations, root cause analysis and management action plans.
4	Process Re-Engineering Design efficient, standardized and controlled processes with clear SOPs and delegation of authority.
5	Post-Implementation Review Ensure process compliance, control effectiveness and drive continuous improvement.

"Delivering measurable impact — not just audit reports."
